RADIANT HEATING SYSTEMS

Assisted Living Facilities, Duplex's, etc...

Floor Heat

Ceiling Heat

Floor Warming

12,000 square foot Assisted Living Facility with the Earth Thermal Storage (Floor Heat) System . Nine separate zones for controlling the temperature and comfort in each area. More zones can be added for even greater control. Rosholt, SD.

The SmartRooms Earth Thermal Storage (Floor Heating) System is worry and maintenance free creating the most comfortable and energy efficient heating system on the market today. 4"- 8" of sand is placed on top of the heating panels for an even distribution of heat. Can be used as primary source of heat.

The SmartRooms Radiant Ceiling System is placed above the finished ceiling creating an invisible, silent and, most importantly, comfortable and affordable heating system. Each room can be precisely controlled for even greater savings and individual comfort. Can be used as primary source of heat.

15,000 square foot Assisted Living Facility with the Earth Thermal Storage (Floor Heat) System . Twelve separate zones for controlling the temperature and comfort in each area. More zones can be added for even greater control. Lakota, ND.
